Dương Việt Hoàng

Fresher Java Web Fullstack

I am Java Backend Developer with a solid foundation in Java and backend technologies. Familiar with Spring Boot, Hibernate, and RESTful APIs. Eager to learn and contribute to building efficient and reliable applications.

EXPERIENCE

09/2024 - 11/2024

Individual

E-commerce Website

Description: Developed an E-commerce Website to provide seamless online shopping experiences, integrating a user-friendly front-end built with Angular and a robust back-end powered by Spring Boot.

Responsibilities:

- Implemented RESTful APIs for efficient communication between front-end and back-end.
- Designed and developed features for managing products, categories, and orders (CRUD operations).
- Integrated JWT authentication and authorization for enhanced security.

Technology:

- BE: Java Spring Boot, JPA, Hibernate
- FE: Angular, Bootstrap, TypeScript, SCSS, HTML, JS
- · Database: SQL server
